

Model 23 – Roll Lifting Beams

Used to lift rolls with plate style or Bent Bar “J” Hooks. Hooks are designed to support the core mandrel which is through the I.D. of the roll. Fixed beam lengths can be used for single roll widths. Maximum roll diameters will determine length of “J” hooks.

PRODUCT FEATURES:

- Ideal where headroom is limited.
- Easy lifting and positioning of rolls.
- Adjustable spread options.
- Twin hoist capability.
- Motorized rotation available.
- Designed and manufactured to ASME B30.20.

Options Available

OPTION A

Used when handling rolls of varying widths.

OPTION B

- Bronze/Brass
- Urethane
- Brake Lining
(Min. Shaft Dia.= 6")

OPTION C

Used when two hoists are required to stabilize a lift, when capacities exceed a single hoist or when load rotation is not desirable.

OPTION D

MOTORIZED ROTATION.

Allows remote positioning of a load. For additional information, see Model 21 in our Strong-Bac catalog.

OPTION E

SPREADER WITH PIGGING

Offers greater stability when required headroom is not a consideration.
