

**STREATOR
DEPENDABLE MFG.**

Pin - Pallet

- **Multi-Function** – will accept an assortment of parts. A unique hole pattern means each part is secured by pins to within 1/8" of the edge of each side.
- **Stackable** – both loaded and unloaded. A positive locking mechanism keeps parts and pallets in the air instead of on the floor.
- **Value** – one pin-pallet can replace four containers. The result is better utilization and fewer containers required.
- **Ergonomics** – parts can be slid straight off the side. People do not have to stoop to pick parts out of a container.

We'll use our unique design to manufacture pin pallets in the size that is optimal for your operation. Contact us today or visit us on our web site.
